GTCONNECT

Reduce Risk with Simple, Unified Control

GTConnect leverages cloud control for centralized data and device management.

GTConnect harnesses the power and protection of the cloud to provide a simplified ecosystem that not only streamlines your data and device management but also ensures compliance with data and privacy regulations. GTConnect provides an essential component in robust and frictionless workforce management.

By establishing a scalable and flexible network across devices, you reduce both development and operational costs while offering total data security peace of mind.

With GTConnect, you can ensure that data remains secure while also benefiting from increased accessibility and convenience to analytics and information that can help improve productivity and performance.

- **A total ecosystem that simplifies data and device management**
- **Provides protection for identity data across multiple devices and systems**
- **Maximizes productivity by reducing the need for time on site**

The 6 Key Features of GTConnect

Remote Device Management
Centralized management of your networked devices means you can easily manage updates, run system diagnostics and check the real-time status of your entire estate, whether that's one clock or 10,000.

Data Management
Simplify integrations from devices to your HCM software with our 'cloud-to-cloud' middleware platform.

Identity Management
Ensure compliance with data protection using encryption and informed consent. Biometric and personal data can be managed, distributed, and backed up securely and automatically throughout your network of devices.

Remote Device Diagnostics
The cloud-based diagnostic platform minimizes the disruption of troubleshooting. The advanced tools eliminate the need for engineer visits, reducing downtime and improving service delivery.

System Management
With seamless backup and recovery services, your data is automatically saved to the cloud, ensuring that it is always secure, available and protected against data loss.

Technical Support
Get technical support direct from the manufacturer with guaranteed response and resolution times to reduce downtime.
